**VINEYARDS**

**'Wines from these parts'**  
**Wine cellars and tastings**

Whether a connoisseur or a budding wine-taster you're at the right place. In the heart of the Loire Valley, a region boasting the longest wine route in France, get to grips with the secrets of the region's wines...

The majority of our winegrowers are committed to an environmental approach based on Organic Agriculture or High Environmental Value and the cabernet franc is the almost exclusive grape variety of the appellations of bourgueil and saint-nicolas-de-bourgueil. It produces wines of great aromatic richness, but the specific terroir and way of vinification influence the various wines' characters.

**VALLEY**  
 Stony patches of the former riverbed give sustained, balanced structure to the wines here, as well as fresh, lively tannins. These wines have hints of raspberries, blackberries and violets.

**TERRACE**  
 Sandy, pebbly terraces make for light fruity wines that are great for easy drinking. As well as aromas of raspberries, you may detect wild strawberries. The tannins are subtle and smooth.

**SLOPES**  
 Tufa limestone slopes produce more tannic, powerful, lasting wines, the roots reaching down deep and extracting aromas of black fruits, producing complex wines that are full of substance.
